 General Terms & Remarks**

1. Minimum requirements of LED floodlight units:

- a) Must be designed to withstand mechanical stress and vibration of cranes (at least 5G force shock resistant).
- b) The lighting on the dock must have a minimum measurement of 200 lux. New floodlights will replace the 1000W SON & HPI lights. The color of the floodlights will be decided later through mutual agreement.
- c) Each floodlight must be equipped with a minimum of 1.5 meters of rubber-coated, flexible cable (H07RN) and a safety chain. All components, including the safety chain, must be constructed from stainless steel.
- d) The floodlights must be mounted using stainless steel brackets (AISI 316L), matching the existing positioning holes of the current setup.
- e) Construction materials must meet the following standards:
 - i) The aluminium alloy used must be certified, primary, marine-grade, anodized, and coated with electrostatic paint.
 - ii) All other materials must be anti-corrosive or appropriately coated to resist corrosion.
- f) The floodlights must have an ingress protection rating of IP67 according to IEC 60529.
- g) Each floodlight must be provided with pressure balance element and overheating protection system.
- h) Diffusers must be made of safety glass.
- i) **Proof of Sales:** Bidders must submit proof of sales (e.g., invoices) demonstrating that they have sold at least 500 floodlights in the last five (5) years.
- k) **Warranty:** The floodlights must have a warranty period of at least 8 years, covering all parts. Each unit must be accompanied by the relevant technical documents and certificates (CE, ISO, etc.).
