Subject: **Clarifications (part 1) regarding the 2nd repetitive tender for procurement of two (2) new movable belt conveyors with inverter fully connected to the X-Ray system of the new ISOBOX of PPA SA Cruise and Ferry Department**

Interested parties are kindly requested to refer to all additional information and/or clarifications provided by PPA S.A., regarding the questions received so far in relation to the in subject tender.

The said replies constitute an integral part of the Invitation.

QUESTION 1:

"… Please kindly provide the following information:

1. *Is the X-Ray ISOBOX and X-Ray machine the same concerning dimensions as the already existing?*
2. *Is it acceptable to determine the support heights according to existing floor with adjustment height +/- 20 mm, instead of height adjustment +/-150-200mm?*
3. *With "moving" belt conveyors, you mean a fixed installation with "motor driven" belt conveyors? (not moveable conveyors on wheels)*
4. *Is it acceptable to have one common Panel + PLC for both conveyors, or each conveyor must have its own panel + PLC?*
5. *Must the driven pulleys have a rubber lagging (hot vulcanization) for proper operation in the environment near the sea?*
6. *Must the belts have K- profile guides for proper and maintenance free guidance?*
7. *Is INOX/STAINLESS steel - wherever possible - required? ..."*

ANSWER 1.1:

Yes, the ISOBOX along with the X-Ray system are of the same dimensions as the already existing.

ANSWER 1.2:

We would like them to be adjustable up to 20cm.

ANSWER 1.3:

Correct, by movable we mean fixed installation, with motor driven belt.

ANSWER 1.4:

Yes, it is acceptable to have one PLC and panel controlling both conveyors.

ANSWER 1.5:

If it is suggested for such environment then please add rubber lagging to the drive pulleys at your offer.

ANSWER 1.6:

Yes

ANSWER 1.7:

Movable parts and parts that are exposed to weather conditions are suggested to be inox/stainless steel.
